Northern Michigan University (Marquette Co, MI)
CS 344-01-26F: iOS / iPhone Programming

Program 5
Due: Wednesday 11 November 2024 2:00 P.M. EST

Create a folder called “PG5” in the top level of your CS344-01-26F folder. Copy your XCode project file into this folder. Place a (possibly empty) file or folder called “DONE” into this folder when you are ready to have your programs graded.

Write an app for the iPhone Simulator that does the following:

This is a multitabbed application. One tab prompts the user for a folder name and creates a table listing all the .jpg files in that folder. (It MUST be a table view!!) When a .jpg file is clicked, that image appears in the other tab. You should be able to enter a new folder at any time, but the only time an image is removed from the second tab is when a different image is selected.
