

Eighty-six students on thirty-one teams representing five universities and a secondary school group competed in the Sixteenth Annual NMU Invitational Programming Contest on Saturday 28 March 2015: For each problem, the first number indicates the minutes it took that team to solve the problem; the second number indicates the number of failed attempts by that team on that problem prior to solving it. The minutes are added together and a 20-minute penalty is added for each failed attempt of a problem that was eventually solved. No penalty is added for any problem that was never solved. The teams are ranked by the number of problems that they complete. Ties are broken in favor of the team with the smallest number of minutes.

Totals on each problem

Problem 1: 1 team  
 Problem 2: 6 teams  
 Problem 3: 2 teams  
 Problem 4: no teams  
 Problem 5: 21 teams  
 Problem 6: 21 teams

The three highest-ranking teams from each school had their program counts and completion times summed, with the proviso that grad teams have their counts times halved just prior to this step. The schools were ranked with regard to the highest program count, with ties broken in favor of smaller completion times.
