Northern Michigan University (Marquette Co, MI)
CS 101-04-20F: Website Construction

Assignment 10
Due: Wednesday 11 November 2020 10:00 A.M. EST

Using HTML and JavaScript, write an Internet quiz. You must have at least ten questions. If your quiz uses textboxes for numeric responses or checkboxes, that is perfectly fine; however, most Internet quizzes use only radio buttons, and that is acceptable as well! After the user submits her/his answers, your web page should throw up an another webpage listing their right and wrong answers with their score and some cute title appropriate to that score (for example, "You scored 96%; you are an uber-geek!")

Make sure that any images or multimedia files are stored in a special folder

Your webpage needs to be stored in your W: drive, along with a menu page or it won't be visible from the web. The menu page needs to be in the top level of your W: drive. Your webpage itself should be in a folder called "HW10" in the top level of your W: drive.

I also need a second copy of it in your CS101-04-20F folder, so that I can grade it and make comments. Create a folder called "HW10" in the top level of your CS101-04-20F folder and place a copy of your webpage in that folder. Also place a (possibly empty) file or folder called "DONE" in this folder. When I see the DONE file in your HW10 folder, I will know to grade your assignment. Note: Your file must be called "DONE", exactly. It can't be called "done" or "DONE.txt" or anything like that. DO NOT put a copy of your multimedia folder in your CS101-04-20F folder. That should be in your web folder *only*.

Your menu page needs to be in your web folder, but *NOT* your CS101-04-20F folder.
Your multimedia folder needs to be in your web folder, but *NOT* your CS101-04-20F folder.
Your DONE file needs to be in your HW10 folder within your CS101-04-20F folder, but *NOT* in your web folder.
Your assignment has to be in an HW10 folder in *BOTH* your web folder and your CS101-04-20F folder.
