Northern Michigan University (Marquette Co, MI)
CS 101-04-20F: Website Construction

Assignment 11 (Extra Credit)
Due: Monday 23 November 2020 10:00 A.M. EST

Using HTML and JavaScript, write a fake online order page (think Amazon, only fake). You should allow the user to enter basic information (name, address, etc.) and allow them to order items of some kind (obviously, you don't actually have to fill the order). With cookies, you should be able to recognize the first-time and returning customers. You should greet returning customers by name and using other information appropriate to your website.

Make sure that any images or multimedia files are stored in a special folder

Your webpage needs to be stored in your W: drive, along with a menu page or it won't be visible from the web. The menu page needs to be in the top level of your W: drive. Your webpage itself should be in a folder called "HW11" in the top level of your W: drive.

I also need a second copy of it in your CS101-05-13F folder, so that I can grade it and make comments. Create a folder called "HW11" in the top level of your CS101-05-13F folder and place a copy of your webpage in that folder. Also place a (possibly empty) file or folder called "DONE" in this folder. When I see the DONE file in your HW11 folder, I will know to grade your assignment. Note: Your file must be called "DONE", exactly. It can't be called "done" or "DONE.txt" or anything like that. DO NOT put a copy of your multimedia folder in your CS101-05-13F folder. That should be in your web folder *only*.

Your menu page needs to be in your web folder, but *NOT* your CS101-05-13F folder.
Your multimedia folder needs to be in your web folder, but *NOT* your CS101-05-13F folder.
Your DONE file needs to be in your HW11 folder within your CS101-05-13F folder, but *NOT* in your web folder.
Your assignment has to be in an HW11 folder in *BOTH* your web folder and your CS101-05-13F folder.
