

# Northern Michigan University (Marquette Co, MI)

## CS 101-04-20F: Website Construction

### Assignment 3

Due: Friday 11 September 2020 10:00 A.M. EDT

For this assignment you are going to write a publicity brochure. Your web page should try to convince me to enroll at a specific University.

Your web page should include at least three image files, relevant to the brochure. Text should flow around the images in a cool way; it shouldn't be just picture-text-picture-text, etc. The text itself should also look cool, but remember, use the CSS commands, not the older commands. You should use a reasonable amount of "special characters" in this assignment, at least three.

Your images should all be stored together in a special folder. I'll show how to do this in class.

Your webpage needs to be stored in your web folder, along with a menu page or it won't be visible from the web. The menu page needs to be in the top level of your web folder. Your webpage itself should be in a folder called "HW3" in the top level of your web folder.

I also need a second copy of it in your CS101-04-20F folder, so that I can grade it and make comments. Create a folder called "HW3" in the top level of your CS101-04-20F folder and place a copy of your webpage in that folder. Also place a (possibly empty) file or folder called "DONE" in this folder. When I see the DONE file in your HW3 folder, I will know to grade your assignment. Note: Your file must be called "DONE", exactly. It can't be called "done" or "DONE.txt" or anything like that.

Your menu page needs to be in your web folder, but *NOT* your CS101-04-20F folder.

Your DONE file needs to be in your HW3 folder within your CS101-04-20F folder, but *NOT* in your web folder.

Your assignment has to be in an HW3 folder in *BOTH* your web folder and your CS101-04-20F folder.
