CS 101-04-20F: Website Construction

Assignment 5

Due: Monday 28 September 2020 10:00 A.M. EDT

This web page involves multimedia. You are to create a web page about an *interesting* topic of your choice. (Creativity is FUN!) Somewhere in your page should be an embedded PDF file and somewhere should be an embedded audio or video file. They should be embedded, not linked. Other than this, your web page should be pleasing to the eye, as usual. Use good styles, background, etc. And, of course, watch that spelling and grammar! Your multimedia files should be in a special folder (much like the images were a few assignments ago).

Your webpage needs to be stored in your web folder, along with a menu page or it won't be visible from the web. The menu page needs to be in the top level of your web folder. Your webpage itself should be in a folder called "HW5" in the top level of your web folder.

I also need a second copy of it in your CS101-04-20F folder, so that I can grade it and make comments. Create a folder called "HW5" in the top level of your CS101-04-20F folder and place a copy of your webpage in that folder. Also place a (possibly empty) file or folder called "DONE" in this folder. When I see the DONE file in your HW5 folder, I will know to grade your assignment. Note: Your file must be called "DONE", exactly. It can't be called "done" or "DONE.txt" or anything like that. DO NOT put a copy of your multimedia folder in your CS101-04-20F folder. That should be in your web folder *only*.

Your menu page needs to be in your web folder, but *NOT* your CS101-04-20F folder.

Your multimedia folder needs to be in your web folder, but *NOT* your CS101-04-20F folder.

Your DONE file needs to be in your HW4 folder within your CS101-04-20F folder, but *NOT* in your web folder.

Your assignment has to be in an HW4 folder in *BOTH* your web folder and your CS101-04-20F folder.
