CS 101-04-20F: Website Construction

Assignment 7

Due: Monday 19 October 2020 10:00 A.M. EDT

Make a web page containing two iframes. The left iframe will contain a list of links of pages to show up in the right iframe. Because of the due date on this assignment, the theme of your web page should be “Columbus Day/Indigenous Person Day” You have creative freedom concerning what these links point to but you must have at least four links, and the links should be to pages that you create yourself (i.e. NOT to the IMDB).

Make sure that any images or multimedia files are stored in a special folder.

Your webpage should also be *cool*, not *lame*! Creativity is fun!

Your webpage needs to be stored in your W: drive, along with a menu page or it won't be visible from the web. The menu page needs to be in the top level of your W: drive. Your webpage itself should be in a folder called “HW7” in the top level of your W: drive.

I also need a second copy of it in your CS101-04-20F folder, so that I can grade it and make comments. Create a folder called “HW7” in the top level of your CS101-04-20F folder and place a copy of your webpage in that folder. Also place a (possibly empty) file or folder called “DONE” in this folder. When I see the DONE file in your HW7 folder, I will know to grade your assignment. Note: Your file must be called “DONE”, exactly. It can't be called “done” or “DONE.txt” or anything like that. DO NOT put a copy of your multimedia folder in your CS101-04-20F folder. That should be in your web folder *only*.

Your menu page needs to be in your web folder, but *NOT* your CS101-04-20F folder.

Your multimedia folder needs to be in your web folder, but *NOT* your CS101-04-20F folder.

Your DONE file needs to be in your HW7 folder within your CS101-04-20F folder, but *NOT* in your web folder.

Your assignment has to be in an HW7 folder in *BOTH* your web folder and your CS101-04-20F folder.
