

Northern Michigan University (Marquette Co, MI)

CS 101-04-20F: Website Construction

Assignment 8

Due: Monday 26 October 2020 10:00 A.M. EDT

You are going to make a web page that conducts a survey about Halloween. The specific details of the survey are up to you. You should create a form that requires at least three pieces of text, at least one question requiring a menu selection, at least one question requiring a checkbox answer, and at least one question requiring a radio button answer. The results of the form should be sent to apoe@nmu.edu . It's not enough for your form to work; as always, your web page must look cool!!

Make sure that any images or multimedia files are stored in a special folder

Your webpage needs to be stored in your W: drive, along with a menu page or it won't be visible from the web. The menu page needs to be in the top level of your W: drive. Your webpage itself should be in a folder called "HW8" in the top level of your W: drive.

I also need a second copy of it in your CS101-04-20F folder, so that I can grade it and make comments. Create a folder called "HW8" in the top level of your CS101-04-20F folder and place a copy of your webpage in that folder. Also place a (possibly empty) file or folder called "DONE" in this folder. When I see the DONE file in your HW8 folder, I will know to grade your assignment. Note: Your file must be called "DONE", exactly. It can't be called "done" or "DONE.txt" or anything like that. DO NOT put a copy of your multimedia folder in your CS101-04-20F folder. That should be in your web folder *only*.

Your menu page needs to be in your web folder, but *NOT* your CS101-04-20F folder.

Your multimedia folder needs to be in your web folder, but *NOT* your CS101-04-20F folder.

Your DONE file needs to be in your HW8 folder within your CS101-04-20F folder, but *NOT* in your web folder.

Your assignment has to be in an HW8 folder in *BOTH* your web folder and your CS101-04-20F folder.
