

Write the JavaScript portion (between `<SCRIPT>` and `</SCRIPT>`) of a website that rates the points for the following question:

What is the best ice cream?

- Chocolate
- Vanilla
- Strawberry

The form's name is “icecream”. The question's name is “best.” One choice is worth 1 point, one is worth 2, and one is worth 3 (which is which is up to you). The JavaScript should print out the score. You do not have to write the FORM, just the JavaScript.

Quiz 11 — Bonus

Time: 10 minutes

```
<SCRIPT>
function grade () {
  var score = 0
  if (document.icecream.best[0].checked)
score = 1;
  if (document.icecream.best[1].checked)
score = 2;

  if (document.icecream.best[2].checked)
score = 3;
  document.write ('<BODY>')
  document.write ('<P>')
  document.write ('Your score is ')
  document.write (score)
  document.write ('</P>')
```
