CS201-01-22F: Programming In C++ (Andrew A. Poe)
Practice Quiz 6   Wednesday 26 October 2022 11:00 A.M. EDT

Time: 15 minutes.

Write the following method (not a whole program):

```
void stoS (string fname);
```

This method takes the file named in fname and replaces all instances of "s" in that file with "S". You should not create a new file or completely rewrite the existing one. Change only the "s"'s.

```cpp
void stoS (string fname) {

fstream f
(fname,ios::in|ios::out|ios::binary);
 f.seekg (0,ios::end);
 int flen = f.tellg();
 for (int pos=0; pos < flen; pos++) {
  f.seekg (pos);
  char ch;
  f.get(ch);
  if (ch=='s') {
   f.seekp (pos);
   f << "S";
```

```
    }
  }
  f.close ();
}
```
