Quiz 9

Friday 15 November 2024 1:00 P.M. EST

Time: 15 minutes.

Your view contains a `WKWebView` . It is already there and connected to a variable `wv` through the storyboard. You also have four text fields: `longdeg` , `longmin` , `latdeg` , `latmin` . All are already there and connected to the storyboard.

Write code to load up in the web view the Google map of the latitude and longitude information stored in these textfields. Assume the northern and western hemispheres. The textfields only store numbers; you have to add the special symbols yourself in code.

```
let longdegt:String = longdeg!.text
let longmint:String = longmin!.text
let latdegt:String = latdeg!.text
let latmint:String = latmin!.text

let url = URL
("https://www.google.com/maps/place/\(latdegt)\u{b0}\(latmint)'N+\(longdegt)\u{b0}\(latmint)'W")
let requestObj = URLRequest (url:url!)
wv!.load (requestObj)
```
