CS 480-01-24W: Senior Project

Part 4

Due: Friday 19 February 2024 5:00 P.M. EST

Create a folder called "SCHEDULE" in the top level of your CS480-01-24W folder. Place all files pertaining to this assignment into the top level of your SCHEDULE folder. Place a (possibly empty) file called "DONE" into this folder when you are ready to have your advisor logged.

In the sample code folder, you will find an Excel file called "schedule.xlsx" . Copy this onto your hard drive, and fill out the grid.

For each square that represents a good time for you to present your project, place a G in the square. The G is for GOOD. This is a time you would LIKE to present.

For each square that represents an acceptable time for you to present, place an A in the square. The A is for ACCEPTABLE. This means that you could make this work, but it's not ideal.

For each square that represents a time you literally cannot present, put an N in the square. The N is for NOWAY. If you have a direct conflict, such as a final exam, that's what the N is for.

I am going to try to give as many people G's as I possibly can. Failing that, I will assign people to A's.

Put your completed schedule within your SCHEDULE folder. Place a possibly empty file or folder named DONE in your SCHEDULE folder alongside your schedule. DO NOT place your schedule inside the DONE folder!
