Northern Michigan University (Marquette Co, MI)
CS 480-01-24W: Senior Project

Part 5
Due: One week before your presentation

Create a folder called "PAPER" in the top level of your CS480-01-24W folder. Place all files pertaining to this assignment into the top level of your PAPER folder. Place a (possibly empty) file called "DONE" into this folder when you are ready to have your advisor logged.

You will need to write a paper about your project. Eight pages is a good estimate for the approximate length of the paper. The paper is not specifically an instruction manual; it's more about the project experience itself. Why did you choose this project? What tools did you use to solve it? What concepts or technologies did you have to learn to get it going? And, of course, what does your project do? Do not be intimidated by the paper. It's not a big part of your grade, but you still have to do it.

Make sure that your paper is either DOCX or PDF format. I will make sure that your committee receives the paper, although it doesn't hurt to e-mail your committee directly as well. (But in any event, put your paper in the submission folder!)
