CS 498-50-23W: Practical Kotlin Programming

Program 4

Rate a Book

Create a folder called “PG4” in the top level of your CS345-01-23W folder. Copy your Android project into this folder. Place a (possibly empty) file or folder called “DONE” into this folder when you are ready to have your programs graded.

Write the following program in XML and Kotlin for Android.

Similar to PG3, using fragments, you should now allow 30 books to be displayed on the screen in a scrollable menu. Click on a book to see more information about the movie and rate it from 1 to 5. The rating should also appear in the scrollable menu next to the movie title.
