CS 498-50-23W Practical Kotlin Programming

4 credits

Instructor: Andy Poe, 2230 John X. Jamrich Hall

E-mail: apoe@nmu.edu

This course can be used for the Mobile & Web Application Development major. This course covers Android Programming in Kotlin and XML and discusses the theoretical concepts of object-oriented design and other topics in order to facilitate this.

Text: *Android Programming, The Big Nerd Ranch Guide*, Fourth Edition, by Kristin Marsicano, Brian Gardner, Bill Phillips, and Chris Stewart.. This is the book I am using. You are not required to purchase it yourself. It is, however, relatively inexpensive, especially if acquired on Kindle.

Courseload: There will be frequent programming assignments. These will comprise 20% of your final grade. There will be weekly quizzes comprising a total of 25%. There will be two in-class exams each comprising 15%, and a final exam comprising 25%. Attendance will be worth 10%. (Since this adds up to 110%, your grade will then be divided by 1.1.)

Laptop Policy: Although this is a Computer Science course, the use of a laptop in class is forbidden in class and on exams. There will be exceptions to this policy, such as when we install software or when we have lab days. But, in general, if I'm lecturing, no laptops, or any other distracting electronic equipment such as Walkmans, iPods, cell phones, etc.

Late Policy: Late programming assignments lose 10% per day (Monday, Wednesday, and Friday) until they are submitted.

Office Hours: My office hours will be both electronic and in person this semester. You'll receive the Office Hours Zoom information in every e-mail I send. My official office hours are 11:00 A.M. to 1:00 P.M. and from 4:00 P.M. to 5:00 P.M. every day except Tuesday. Unofficially, if I'm in my office, I'll likely be on Zoom, and I usually begin my day between 8 and 9.

Statement on Plagiarism: Plagiarism is the submission of someone else's work as your own. It applies just as strongly when the work is to be written in a computer language as when it is written in a human language. All of the work you submit must be entirely your own. All of it. Your friends may not write code for you, nor may your classmates, nor tutors, nor professors.

You may not use code found in books or online. All of your code must come from you. Period. Academic fraud is very serious and will be dealt with according to NMU policy. I reserve the right not to accept work that I do not believe comes from you, and I reserve the right to question you about your submitted work. If one student does the work assigned to another student, both students have committed academic fraud and will be dealt with as such.

Course Objectives: At the conclusion of this course, the successful student should be able to make a reasonably sophisticated application for the Android device.

Disability: If you have a need for disability-related accommodations or services, please inform the Coordinator of Disability Services in the Dean of Students Office at 2001 C. B. Hedgcock Building (227-1737 or disserv@nmu.edu). Reasonable and effective accommodations and services will be provided to students if requests are made in a timely manner, with appropriate documentation, in accordance with federal, state, and University guidelines.

Right of Alteration: I have no idea what this semester will bring in terms of the pandemic. I reserve the right to make changes to the syllabus at any time including major changes involving course content, delivery, and grading rubrics.
